

BPMA PLEDGE

At 1Vision Print we have always been conscious of how our actions can affect the environment. However, the BPMA StepForward Pledge has focused our minds on how we can continually look at improving to ensure year on year we as a business contribute towards the bigger picture.

The Pledge has highlighted how as a collective our business can play a small part in ensuring our industry is environmentally conscious and more sustainable. In taking part in this initiative, we are subsequently educating ourselves, thus enabling us to then help educate others in our supply chain.

When selecting products for our catalogue we are always striving to do our bit to reduce our industries impact on the environment and society. As a result, we are continually striving to increase the number of sustainable products featured in our catalogue.

Our catalogue is produced using responsibly sourced paper which is carbon balanced through the World Land Trust.

We recycle and reuse packaging, we deliver direct and more meetings are now held online. Where possible we work with UK and European manufacturers to ensure less air miles. We are looking to build our relationships with more UK and European businesses to reduce air miles which in turn also benefits our customer with quicker lead times.

Our pledge is to be better next year than this year and always be looking for ways in which we can make a difference so we can set an example and in doing so help to educate others.
